Summer Speech Preschool - 5th grade

Speech Therapy

Speech therapy is not just about pronouncing sounds — and myofunctional therapy is about so much more than exercises. Together, they support the foundational skills children need to thrive socially, academically, and physically.

Summer sessions may target:

Speech & Language:

- Clear speech and articulation
- Expressive and receptive language
- Social communication skills
- Early literacy foundations
- Listening and following directions
- Confidence in speaking

Myofunctional Therapy:

- Nasal breathing
- Proper tongue posture
- Oral muscle strength and coordination
- Support for orthodontic development
- Feeding and swallowing patterns
- Sleep quality and overall airway health

Summer is the perfect time to strengthen skills in a relaxed, supportive environment without the pressures of the school year. Sessions are individualized, engaging, and designed to help your child maintain progress, prevent regression, and build lasting foundations before the new school year begins.

Whether your child needs targeted support, wants to stay on track, or could benefit from a communication and breathing boost — summer therapy can make a meaningful difference.
