

Summer Intervention Program

Completion of K5 - 5th Grade

What is Intensive Intervention?

Small group instruction used to increase literacy skills in reading and math.

The purpose of intensive intervention is to accelerate literacy in reading and math development. This allows students the opportunity to make substantial progress towards accomplishing tasks appropriate for their current grade level. This program will accommodate students with the highest need in the advancement of reading and math.

Space is limited for intervention and based upon need. Requests to participate and for more information, please contact Mrs. Longo directly at christina.longo@ilovepca.com.

1

Placement Test

Diagnostic tests provide a profile of literacy and mathematical strengths and weaknesses.

2

Researched-based Instruction

Certified teachers use sensory cognitive instruction.

3

Fun & Engaging Activities

We implement learned instructions into fun activities.

Intensive Intervention for Reading & Math

**Please see tuition and fee schedule page for payment and cancellation policies.*

Summer Speech Preschool - 3 to 5 years old

Therapy Toddler Play Group

Are you looking to increase your child's communication skills? Whether your little one is super vocal or taking their time to express themselves, I'm here to help!

Let's connect through play together. Play helps children learn to understand the world around them. They naturally develop their vocabulary; learn sentence structure, and practice conversations—essential components for speech and language milestones.

Join us in small play groups to help your toddler develop & enhance their communication & social skills.

Parents will develop a special bond as they work with their child to stimulate language, expand vocabulary and develop listening skills through multi-sensory play and literacy activities.

Play groups are limited to 3-5 students per group and are hosted by pediatric speech-language pathologist and orofacial mycologist, Christina Cahill-Longo. Her desire is to empower parents to implement a variety of strategies to carry-over at home.

Space is limited. Requests to participate and for more information, please contact Mrs. Longo directly at christina.longo@ilovepca.com.

Tuition*

Tuition: \$295
6-week session

\$55 per drop-in class
